

WHEN YOU ARE SAVING
LIVES, YOU MAY
NEED DISTANT GUIDANCE
FROM VETERANS.

TRUST VENNFER

In this age of advanced medical practice, more often than not doctors require advice from their fellow men. That's why INTELLISYS brings in a revolutionary video collaboration & tele-medicine software solution, through which medical practitioners and hospitals can share their knowledge and expertise. With **Vennfer**, life becomes really safe and easy.

Vennfer

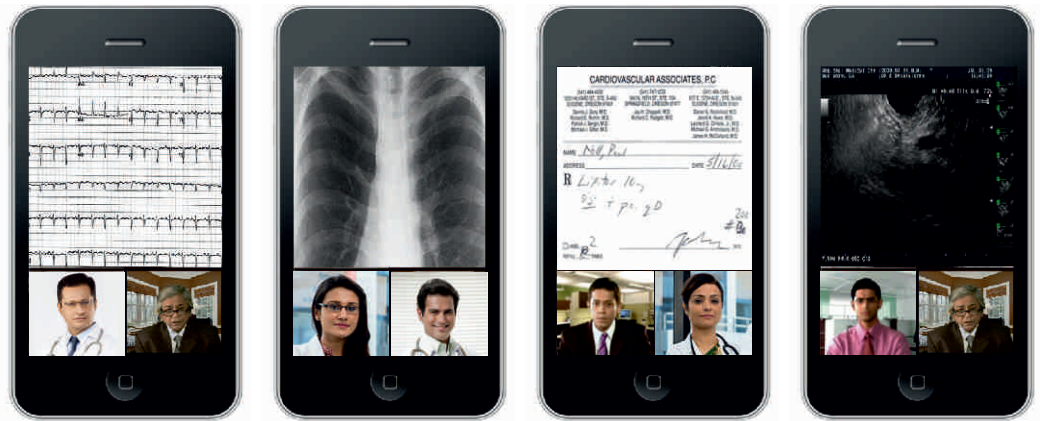

Vennfer is an advanced software based video collaboration & tele-medicine solution based on a highly sophisticated software engine developed by a core team of international software experts of Intellisys. It is a cutting-edge video collaboration software solution that enables real time audio, video, and data communication over LAN, WAN (leased lines, VSATs, VPNs) Broadband and Datacard by using internet based technologies in High Definition / Standard Definition and also web conferencing, thus conserving real time bandwidth in case of synchronous audio and video delivery at multipoint locations providing a highly interactive communication medium.

The various gamuts of tele-medicine are as under:

- Tele - consultation (Direct clinical, preventive, diagnostic, therapeutic, treatment, consultative & follow-up services)
- Tele - monitoring (Remote monitoring of rehabilitation services)
- Tele - mentoring (Education to patients & healthcare professionals)
- Tele – presence (Remote assistance in surgery)
- Continuing Medical Education
- Administration

Vennfer
